

国际海洋技术会展  
OceanTech Program

## **OceanTech Expo 2023 and the All Ocean Renewable Energy Expo are key components of the OceanTech Program 2023 (OT 2023) at Zhoushan Campus, Zhejiang University, May 18-21, 2023**

Headed by Zhejiang University's Ocean College, OceanTech Program, inaugurated in May 2019, is purposely created to provide a unique comprehensive site for live demos, training and exhibits to illustrate a wide range of commercial and research applications for the ocean business communities.

The Nation's premier academic forum, the China Ocean Technology Conference, will be collocated on the Ocean College campus and held concurrently. OT 2021, coinciding with the conference's fifth edition, saw a record attendance of 1000+ leaders from industry, science, research, and government from across China.

OT 2023 provides a dynamic interactive platform for the ocean community. Experts are eagerly looking forward to this biennial event to discuss and share current challenges. Continuous breakthroughs in highly automated and intelligent technologies are leaping into the global blue harvest economy, and are applied in various aspects of the industry:

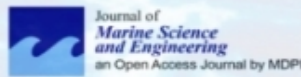

- Offshore operation platform technology for offshore wind power, tidal energy, wave energy, hydrogen energy and other renewable and traditional energy production
- Port and coastal engineering and river system integration
- Ocean fishing and fish farming
- Water depth data collection, surveying, mapping and analytics
- Satellite ocean remote sensing, uncrewed aerial vehicles
- Surface and underwater uncrewed vehicles
- Smart connected ocean

For additional information about participating at OT 2023 with a demo, exhibit space, seminar and/or Hybrid Live/Remote options, please contact:

### The Ocean is the Heart of Our Planet

The OceanTech 2023 Program is unmatched in Asia. It is purposely created for live demos, training and exhibits to address a spectrum of contemporary marine challenges stemming from the global effort to fully explore, understand, chart and sustainably utilize the world's ocean.
